Tipper

We are  
only capable  
of the best

**TISVOL**  
Powered by Superior Quality

## More than 60 years of experience and for the future

### WHY WE DO WHAT WE DO?

Because we have a commitment with you. Make your daily work easier and more profitable by offering products of superior quality, increasingly reliable, lightweight and adapted to your needs.

And by our demand with ourselves to continue being, in the future, leaders in the sector of aluminum semi-trailer tippers through innovation and continuous improvement.

### Superior Quality

It is not just an expression. Superior quality is the natural consequence of the demand for a well done job, a passion for innovation in transport and the satisfaction of knowing that our customers have the best possible tool in the market.

### Reliability

A 5-year warranty can only be offered as standard on the structure of all Tisvol tippers with an absolute certainty of the reliability of our vehicles. Only from the maximum confidence can such a broad guarantee be given.

### Security

Safety comes first. Since tippers are very demanding vehicles, Tisvol has worked hard to obtain the maximum certification by the IDIADA from the strict rule of the United Kingdom according to the test guide of the Institute of Road Transport Engineers, A Level in the *"Tilt Test"*. This is a test of lateral tilt, which guarantees to our customers the confidence in the tipping, even in situations of extreme sideways incline.

TIPPER EXCELLENCE

# TERRA

- SPECIALIST IN MOVING SOIL AND ASPHALT -

The **Terra** tippers perform the most demanding jobs. Robust, reliable and safe are the perfect companion for transport of aggregates and asphalts.

Terra range configurations

Model	Capacity (VR) (m3)	Medium box length (m)	Height (m)	Metal sheet body and CC ribs (CC)	Smooth body panel (E30)	Round body (VR)
Terra - 7,8	25	7,83	1,4	Yes	Yes	Yes
Terra - 8,31	28	8,31	1,5	Yes	Yes	Yes

With **Terra**, no load will be too hard.

# ORGANIC

- SOLUTIONS FOR WASTE TRANSPORT -

We want to contribute making the world more sustainable. The **Organic** series is our way of achieving it.

Focused on waste recycling and classifying to meet the specific needs of this type of transport.

Organic range configurations

Model	Capacity (VR) (m3)	Medium box length (m)	Height (m)	Metal sheet body and CC ribs (CC)	Smooth body panel (E30)	Round body (VR)
Organic - 9,1	34-42	9,1	1,6 - 1,9	Yes	Yes	-
Organic - 9,6	36-45	9,6	1,6 - 1,9	Yes	Yes	-
Organic - 10,6	40-49	10,6	1,6 - 1,9	Yes	Yes	-

The design and own accessories of the **Organic** ranges facilitate the transport of waste, a delicate work.

Maximum tipping. With angles greater than 48°, the vehicles of the Organic range will always unload with maximum efficiency.

Width of 1,400 mm. The maximum width between beams makes the vehicle more stable.

Frontal and rear anti-overflow plates to control the risk of liquid outflow.

Recessed single door to offer maximum possible sealing.

Auxiliary closures in the door, a safety bonus.

# NATURA

- EXPERT IN MOVEMENT OF BIOLOGICAL REMAINS, SANDACH -

The absence of leaks is fundamental in all types of transport, but depending on the load, it is absolutely essential. Transports with animal remains are one of those cases and, for this, the **Natura** range has the solution.

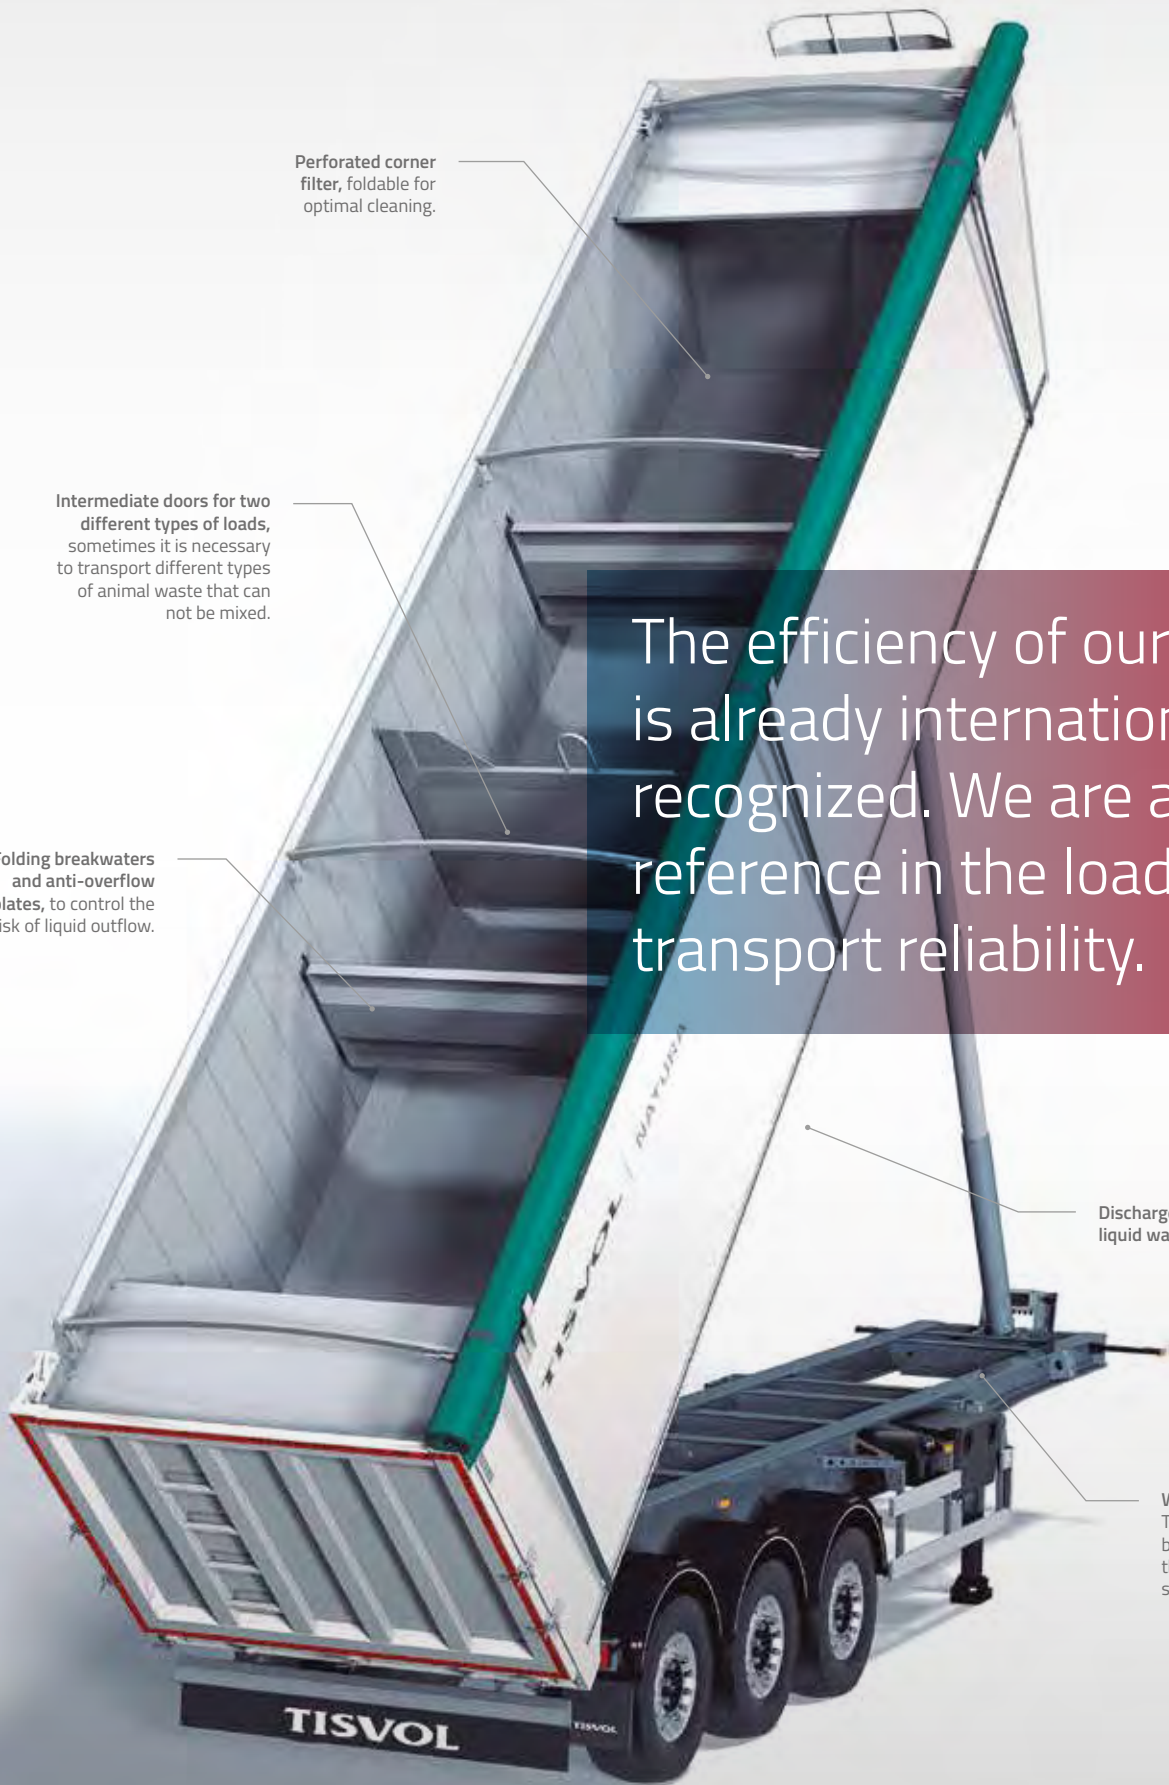

Natura range configurations

Model	Capacity (VR) (m3)	Medium box length (m)	Height (m)	Metal sheet body and CC ribs (CC)	Smooth body panel (E30)	Round body (VR)
Natura - 10,1	42 - 53	10,1	1,7 - 2,1	-	Yes	-
Natura - 10,5	44 - 55	10,6	1,7 - 2,1	-	Yes	-

Auxiliary closures in the door, for maximum safety.

Complete interior welding to prevent leaks, carried out in a robotized system.

Perforated corner filter, foldable for optimal cleaning.

Intermediate doors for two different types of loads, sometimes it is necessary to transport different types of animal waste that can not be mixed.

Folding breakwaters and anti-overflow plates, to control the risk of liquid outflow.

The efficiency of our doors is already internationally recognized. We are a reference in the load transport reliability.

Discharge valves for liquid waste collection.

Width of 1.400 mm. The maximum width between beams make the vehicle more stable.

# SOLID

- MULTIPLE LOADS FOR MEDIUM BULKS -

The **Solid** range supports multiple loads, but is ideal for medium bulk transport. An authentic multitool that will allow you to get to where you propose with maximum profitability.

## Solid range configurations

Model	Capacity (VR) (m3)	Medium box length (m)	Height (m)	Metal sheet body and CC ribs (CC)	Smooth body panel (E30)	Round body (VR)
Solid - 9,6	41 - 46	9,6	1,8 - 2,0	Yes	-	-
Solid - 10,6	45 - 50	10,6	1,8 - 2,0	Yes	-	-

# CERES

- VERSATILITY FOR LIGHT LOADS AND PALLETS -

Our “the more, the better!” range. A larger tipper, a higher volume load and lower tare to optimize transport and make it more profitable.

Ceres range configurations

Model	Capacity (VR) (m3)	Medium box length (m)	Height (m)	Metal sheet body and CC ribs (CC)	Smooth body panel (E30)	Round body (VR)
Ceres - 10,6	50 - 58	10,6	1,9 - 2,2	-	Yes	-
Ceres - 11,6	55 - 63	11,6	1,9 - 2,2	-	Yes	-

# METAL

- FIRMNESS IN THE TRANSPORT OF FRAGMENTED SCRAP -

The fragmented scrap is a difficult load: cuts, wears out and punishes a normal tipper. That's why the **Metal** range is designed specifically for this type of transport.

## Metal range configurations

Model	Capacity (VR) (m3)	Medium box length (m)	Height (m)	Metal sheet body and CC ribs (CC)	Smooth body panel (E30)	Round body (VR)
Metal - 10,6	47 - 53	10,6	1,9 - 2,1	Yes	-	-
Metal - 11,6	52 - 58	11,6	1,9 - 2,1	Yes	-	-

Compatible with two frontal types, E (external cylinder) with inclination and easy discharge or C (bell cylinder) for when you want to take advantage of the ground and make returns with rods or beams.

Double ribs from the first axle or for the complete vehicle. An extra reinforcement for a load that generates a lot of pressure.

CC body, maximum resistance for a demanding load.

Reinforced thicknesses of up to 10 mm on the floor and 6 mm on the sides. Of course, the maximum strength and hardness.

"The best way to turn heavy metal into a light load."

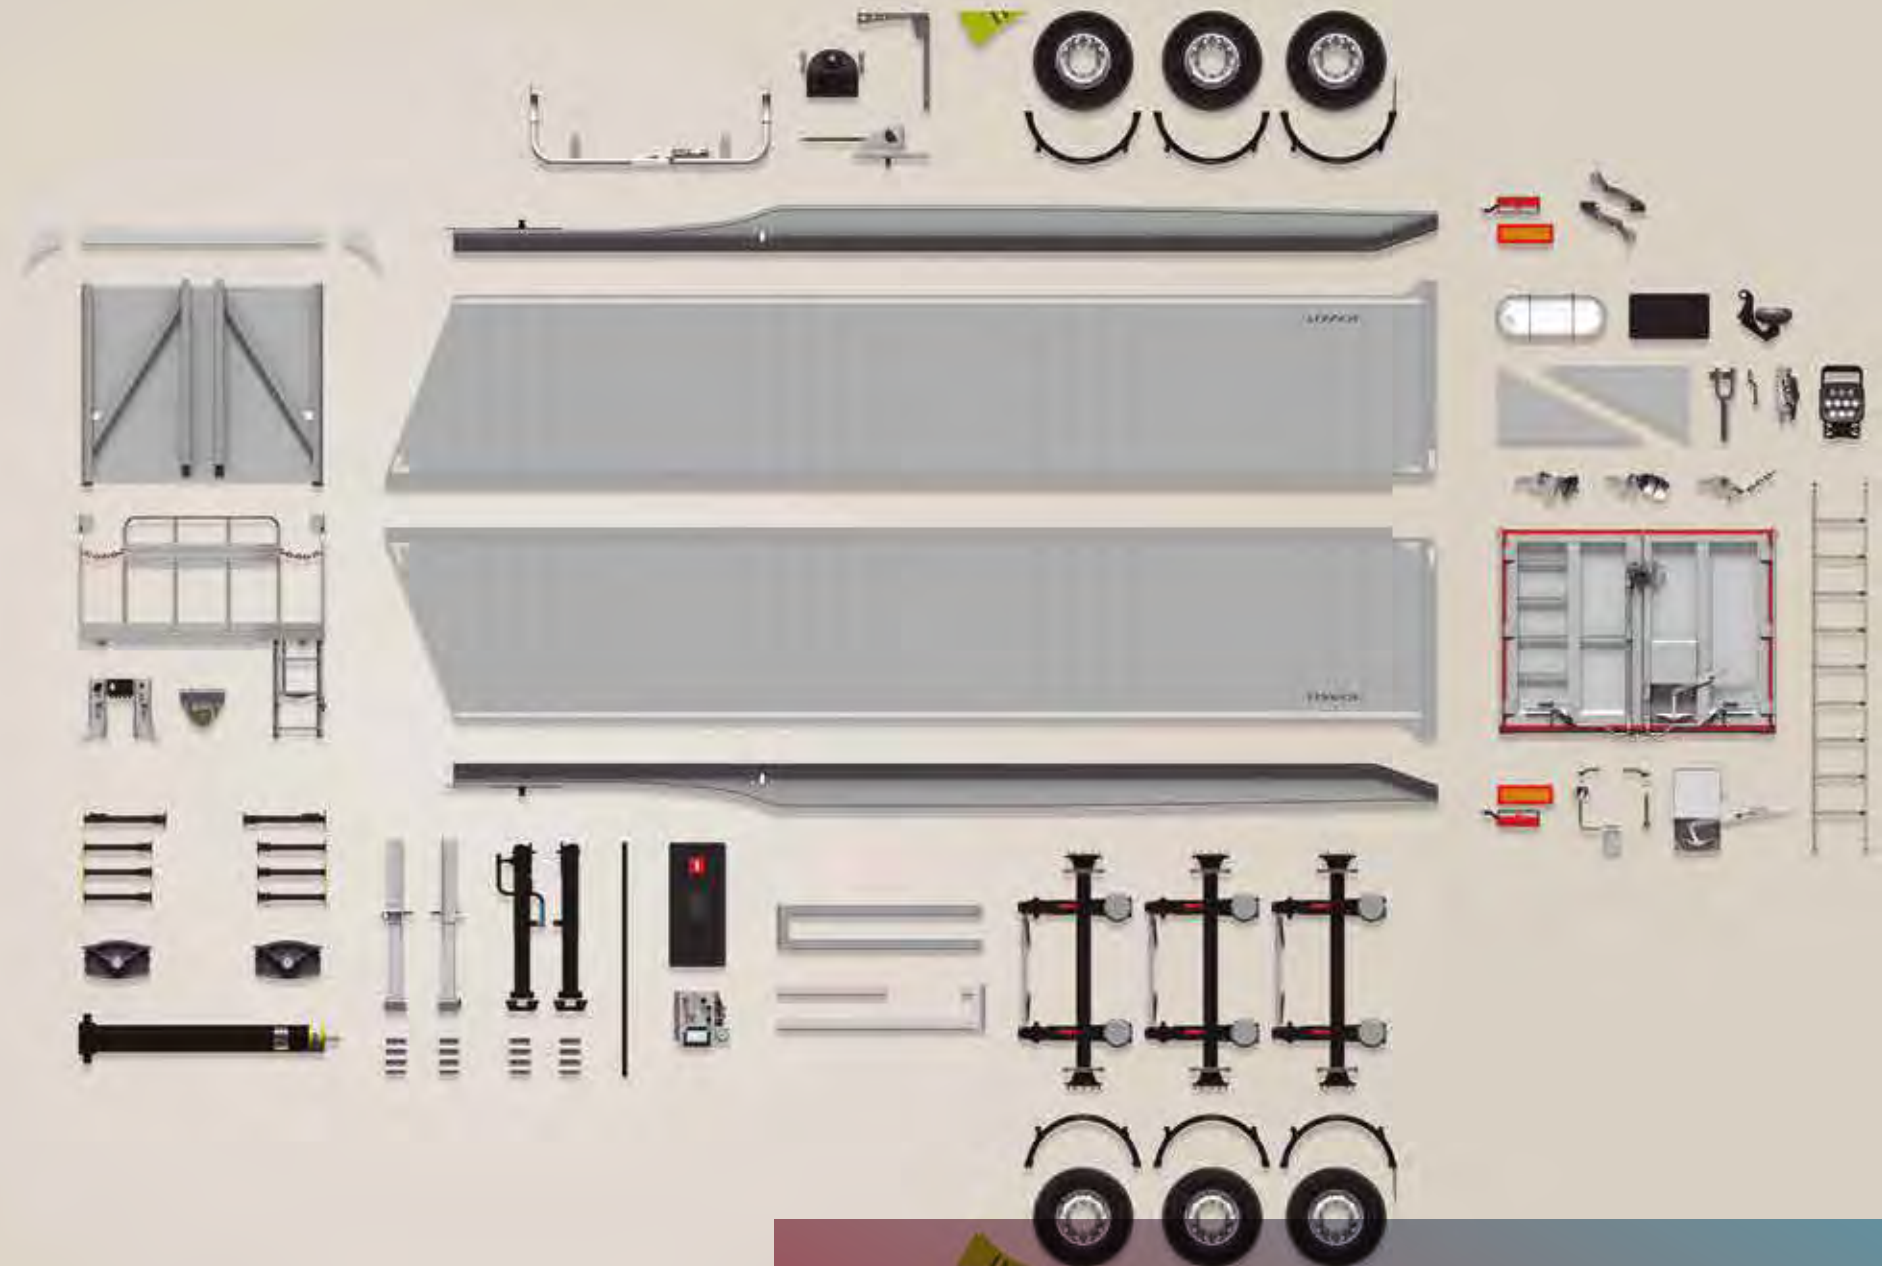

# MyTisvol

- THE TISVOL CUSTOMIZABLE RANGE -

From our website you can configure a new Tisvol tailored to your needs. Choose and combine the components and accessories you want to obtain a fully customized tipper.

And if you still do not find what you are looking for, contact us: our engineers love challenges.

Combine the best of Tisvol to build a unique tipper.

## A DECISION

It is deciding that, even though you have come very far, you want to go a step further. You not only want to count with superior quality on your day to day, but you also want to maximize the performance of your vehicle to achieve excellence.

In Tisvol we give you the possibility to take this decision. That's why we offer you **COROA**, the way to take your tipper to the next level. Through its innovative structure design, we achieve maximum stability, safety and resistance in the tipper.

With a **COROA** you choose:

- Cylinder over the Kingpin
- Reduction of the chassis neck
- Lower gravity center
- Widest chassis
- Stability Increase
- Tare reduction
- Higher cubic capacity
- Maximum security

**COROA** is the decision you take  
when you only want the best.

Ranges with COROA option:

**NATURA**  
c o r o a

**SOLID**
